

#Basic Syntax of HTML

//This code must be written every time when creating a website

```
<html>

<head>

<title>..give your webpage title.. </html>

</head>

<body>

..website code here....

.....

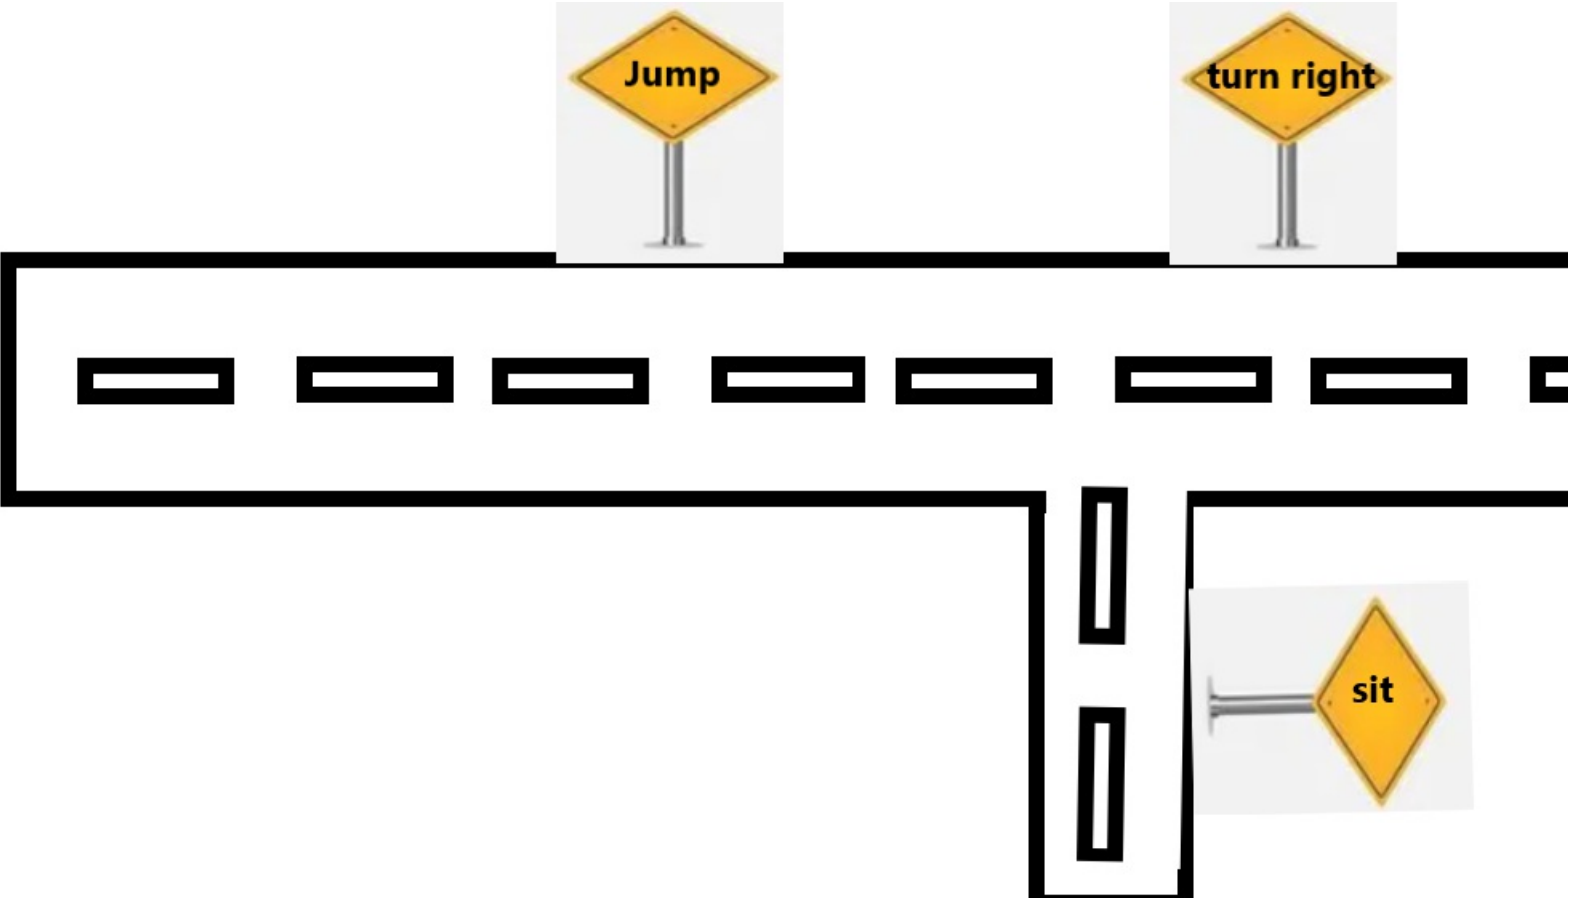

.....

.....

</body>

</html>
```

How tag works in HTML.

Tag are like Sign board on the road:

- The sign board tells us what to do
- the tag tells html what to do
- The tag (signboard) can be identify with <> this symbol.

Example: <p> </p>

There are different tag(signboard) that tell what to do

- <center> </center> tag tells to write a text in center
-
 this tag tells html to break the line (go to new line)
- this tag tells to **bold** the text.

<u> </u> This tag tells to give underline to the text.

<i> </i> This tag tells to make text *italic*

<h1> </h1> tag tells to write a text in big size

<h2></h2> tag tells to write a text in small size than h1

<h3></h3> tag tells to write a text in small size than h2

<h4></h4> tag tells to write a text in small size than h3

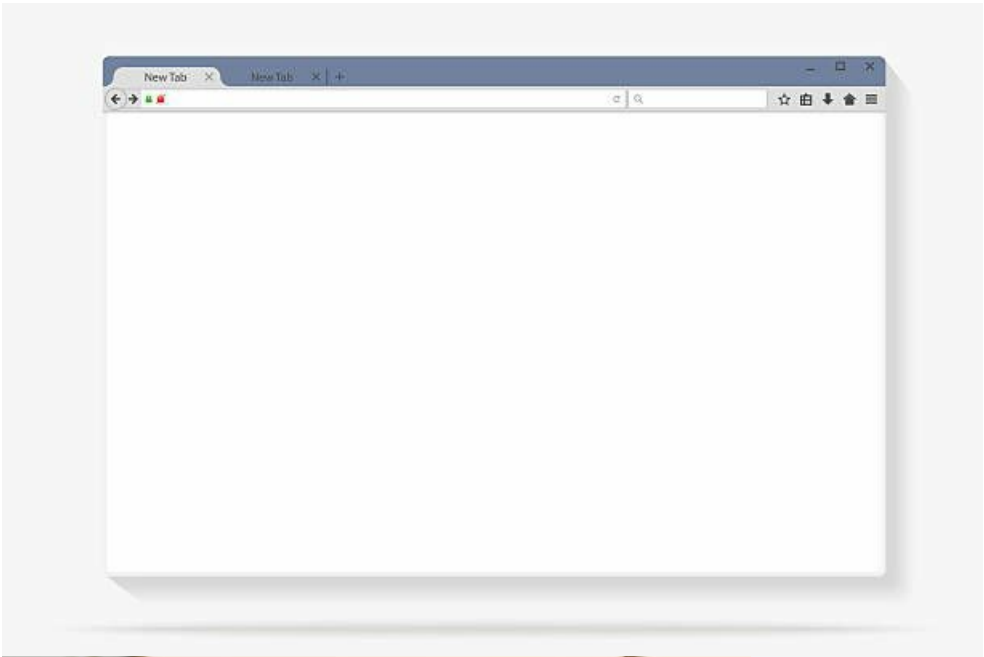

<h5></h5> tag tells to write a text in small size than h4

<h6></h6> tag tells to write a text in small size than h5

Example: 1

```
<html>
<head>
<title>practice </html>
</head>
<body>
<center> Computer Course </center>
</body>
</html>
```

output

Computer Course

Example:2

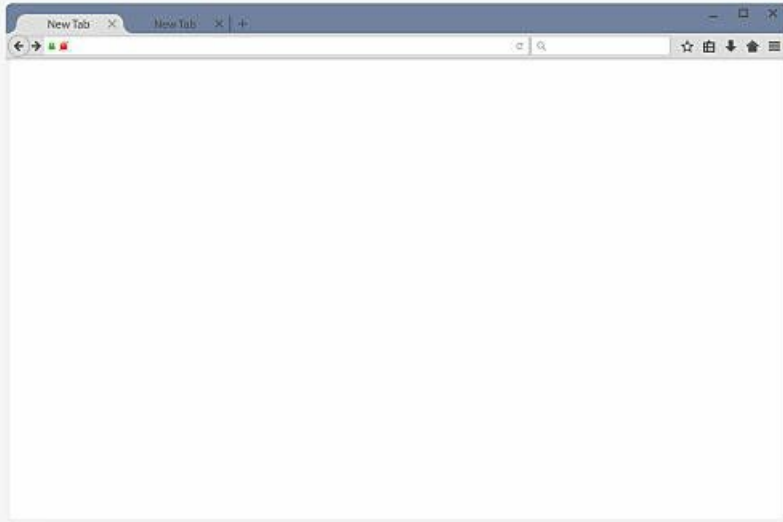

```
<html>
<head>
```

```
<title>practice </html>
```

```
</head>
```

```
<body>
```

**Hello, I am learning web Development
 course. My aim is to
 be a web developer.**

```
</body>
```

```
</html>
```

output

Hello, I am learning web Development

Course. My aim is to

be a web developer.

Example:3

```
<html>
```

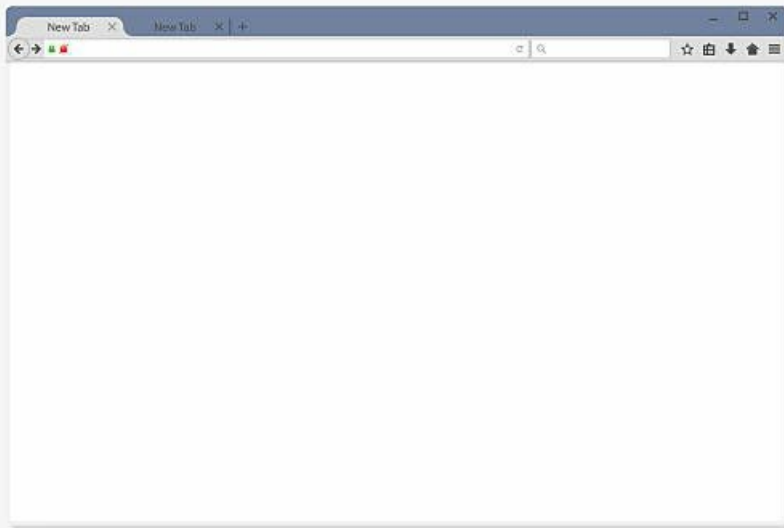

```
<head>
```

```
<title>practice </html>
```

```
</head>
```

```
<body>
```

**Hello, are you enjoing web site development **

</body>

</html>

output
